CAREER OBJECTIVE

As a passionate and dedicated Full-Stack Web Developer, my goal is to contribute to the growth of a forward-thinking organization by leveraging my technical skills in HTML, CSS, JavaScript, PHP, React, and.I seek an environment that values continuous learning and innovation, where I can face new challenges and grow both personally and professionally.As a fresher, I am eager to apply my academic knowledge in real-world projects and become a valuable part of a collaborative team.

SKILLS

Frontend: HTML5, CSS3, JavaScript, Bootstrap, React.js, Tailwind CSS
Backend: PHP,
Database: MySQL
Tools & IDEs: Git, GitHub, XAMPP, VS Code, Notepad++, Canva, Skype
Other Skills: API Integration, RESTful APIs, JSON, Form Handling, Authentication, AJAX

PROJECTS

🎮 **Tic Tac Toe Game** 🔗 **Project Code: GitHub Repository**

- 🛠 **Tech Stack:**
- **Frontend:** HTML, CSS, JavaScript
- 📄 **Description:** The Tic Tac Toe game is a classic 2-player board game implemented using pure HTML, CSS, and JavaScript. It offers an interactive and fun way to play directly in the browser, showcasing core programming logic and DOM manipulation skills.
- ✨ **Highlights:** 🎲 Two-player turn-based gameplay logic (X and O). 🧠 Win detection for rows, columns, and diagonals. 🚫 Draw condition check and reset functionality.

💬 **Messenger Clone** 🔗 **Project Code: GitHub Repository**

- 🛠 **Tech Stack:**

    Frontend: HTML, CSS, JavaScript

    UI Styling: Custom CSS with Flexbox for layout

- 📄 **Description:** The Messenger Clone is a front-end replica of a messaging interface inspired by modern chat apps like Facebook Messenger. It offers a clean UI and mimics real-time chat features with dummy messages and user/bot styles.
- ✨ **Highlights:** 💬 Chat interface with user and bot-style message bubbles. 👤 Static avatars and dummy message content for conversation simulation.

🌍 **DeepTravel - Travel Booking UI** 🔗 **Project Code: GitHub Repository**

- 🛠 **Tech Stack:**

    Frontend: HTML, CSS, JavaScript

    Design Approach: Responsive layout with modern UI styling.

- 📄 **Description:** DeepTravel is a front-end travel booking website UI designed to give users an immersive experience while planning and booking trips. The application showcases modern travel website elements like destination cards, search bars, navigation, and featured deals. Though static, it simulates a real-world travel portal interface.
- ✨ **Highlights:** ✈️ Eye-catching hero section with destination-focused visuals 🔍 Search bar for destinations and bookings (UI only) 🖼 Well-structured layout with destination cards and highlights.

🎓 **Student Management CRUD System** 🔗 **Project Code: GitHub Repository**

- 🛠 **Tech Stack:**

    Frontend: HTML, CSS, JavaScript, Bootstrap

    Backend: PHP

    Database: MySQL

- 📄 **Description:** The **Student Management CRUD System** is a full-stack web application that allows users to **Create, Read, Update, and Delete (CRUD)** student records. Built using PHP and MySQL, this project is designed for managing student information in a structured and efficient manner.
- ✨ **Highlights:** 📋 Add new student records with essential details like name, email, course, etc 📄 View all student records in a clean, tabular format. ✏️ Edit and update existing student information. 🗑 Delete student entries with confirmation. 🍪 Backend connected to MySQL for real-time data storage and management.

EDUCATION	CERTIFICATE
Adhunik Institute of Education & Research	**Full-Stack Web Development Certificate**
Bachelor of Computer Applications (BCA)	[Akhil Bhartiya Computer trainer Assocaition] Duration:- 1 Year
Higher Secondary Education (12th - PCM)	**ADDITIONAL INFORMATION**
M.S Public School	**Languages:** English,Hindi;
	Strength: Quick learner and adaptable to new technologies.
